

AlmostGolf Balls

Sitting at home on a beautiful day, wondering why I am not on the golf course. I open my 12 pack of the **AlmostGolf Balls**. I started chipping little shots against the wall. When you hit it good, the ball rolls back to you. I like that, no damage to the wall. Took dead aim at the fish bowl, smack on first shot, no breakage. I flop it over the coffee table, lop it over my wedding picture, hit the clock dead on. Clock still working? This is too good to be true. Do you know how much fun it is to practice golf shots off the TV, again and again? I have to apologize to Kelly from the Golf Channel for repeatedly hitting her in the head.

I am not kidding! This ball is the real deal. Invented by the Peterons brothers, Rob and Tom who love to play golf, but work too hard. So they invent a golf ball they can play anywhere and anytime. The ball has the exact flight of regular balls and true to mishits. I watched people hit this **AlmostGolf Ball** at a recent golf show and they loved it. This golf ball could change the face of golf.

With the **AlmostGolf Ball**, the world is your golf course. Now you can step out into your backyard, local park or the living room and hit away with a ball that feels and performs like a regular golf ball. For more information on this product, go to www.almostGolf.com

RoboKaddy

This is the neatest, lightest, powered cart that obeys your every command by remote control. This cart travels forward, left, right, and even in reverse. You simply direct operations via the pocket sized transmitter, while two whisper quiet motors drive the independently controlled rear wheels. Just as impressive is that the whole, super lightweight aluminum/titanium alloy unit folds up completely in a few seconds to store easily in the trunk of the car.

For the ultimate in ease and maneuverability on course, you won't find a better caddy than the **RoboKaddy**. To find out more about the **RoboKaddy** contact **Golf Sellers Direct** at 800-337-7692. Or you can look us up on the web at www.golfsellersdirect.com.

Sole Custom Footbeds

You heard the old cliché, Food for the soul! **Sole Custom Footbeds** are soles for the golf feet. They are designed to custom fit your shoes that you depend on every day. Whether you are on the job, on the links or riding in a golf cart every day, the heat can take its toll on your tootsies. Did you know that they have a PPW (Perforated Polyester Weave) which is a fabric designed to wick the moisture off your sweaty feet on the golf course?

After enormous success with running, skiing and cycling over the past two years, golf was a natural progression. A golfer's goal is to improve their game. **Sole Custom Footbeds** goal is to improve your comfort. You now have the ability to totally customize your footwear. Using "heat to fit" technology, the footbed is molded perfectly to each individual's foot. The result is unprecedented support cushioning and comfort when inserted into any pair of shoes and at a reasonable cost.

Sole Custom Footbeds wants to ensure your complete satisfaction. If you love the product tell your friends. If you don't love the product, let **Sole Custom Footbeds** know and they will do their best to make it right! For more information on the Sole go to www.itsyoursole.com.
